

Late Local Teacher Dies In Edmonton

It is with regret that we report the death of Mr. O. M. Bird, who was well-known here, having taught at Didsbury School last year.

The death occurred at six o'clock on Wednesday evening last in the Edmonton Hospital of O. M. Bird, a teacher on the staff of the Lethbridge Collegiate Institute. Deceased had been on the High School staff for two years and had intended to return this fall. He was ill for about two weeks, suffering from typhoid fever. Both parents, Mr. and Mrs. R. O. Bird, reside in Edmonton, as well as a sister, Gwen and a brother, Henry.

Mr. Bird was 26 years of age and first spent a year in the city, three years ago when he was on the teaching staff of Hardieville School. Later, he moved to Edmonton, where he attended the University of Alberta, studying medicine. He had intended to complete his course in a few years.

Mr. Bird was one of the strongest teachers on the Collegiate staff, a very complimentary inspector's report being received but a short time ago. He was popular both with the student body and other teachers, his fine character making him a general favorite. The young man was brilliant in teaching and promised to go far in the practice of medicine.

While resident at his Edmonton home, Mr. Bird was suddenly stricken with typhoid fever, being removed at once to the hospital. He appeared to be making favorable progress when a sudden turn for the worse was experienced, resulting in his demise last Wednesday evening. The funeral was held in Edmonton on Friday.—Lethbridge Herald.

Rearing Ponds To Be Built On Bear Creek

At a meeting of the Fish & Game Association held Monday night, the development of a fish cultural pond in Bear Creek tributary to Fallen Timber was discussed.

It is the intention of the Association to place a dam across the creek on Mr. Percy Fair's property and the placing of approximately one-hundred-thousand fry. When they become fingerlings they will be released into the different streams in the district.

Mr. Rodd, supervisor of fisheries will be here in the near future to give the necessary official sanction and when this has been obtained, the Association will proceed with the work.

This is only one of the activities of the local Association which is affiliated to the Provincial Association, is doing and all sportsmen should be interested in their efforts. The Association is desirous of increasing its membership and a drive for this purpose will take place shortly.

A number of members who are hatching Mongolian and ring-neck pheasants, report having good success.

Warning Given to Automobile Drivers.

Warning is herewith given to the public by the Alberta Provincial Police that the practice of fast driving through the streets of towns or villages, also the practice of making turns at other than at the end of street blocks, must be discontinued at once; NO further warning will be given. People who have been in the habit of breaking the laws in this respect will, if they continue to do so, find themselves halted into court.

LOCAL & GENERAL

Mr. and Mrs. Dave Sinclair motored to Sylvan Lake on Sunday.

Miss Knudsvig returned this week from her holidays at Camrose.

Just the rig for your telephone desk. Scratch pads at the Pioneer Office, 2 for 5c.

Mr. and Mrs. Ted Brown of the Bank of Montreal are taking a two weeks vacation. They will visit McLeod and Waterton Lakes.

Misses Laura and Lucille Smith, Misses Clements and Helen Shantz of Calgary are enjoying a camping vacation at Sylvan Lake.

Mr. and Mrs. Hale Gochee and Mr. and Mrs. Wendell Gochee are making a motor and camping tour in the mountains.

Mr. and Mrs. W. J. Hillyard entertained Mr. and Mrs. W. Derby of Medicine Hat last week. While here, they looked up a number of old friends.

Miss Hubbard who has resigned from Didsbury Hospital staff, left on Tuesday for Wetaskiwin. Mrs. A. Boyce is in temporary charge of the hospital.

Mr. and Mrs. E. Reider and son Willard returned on Monday evening from a seven weeks motor trip to California and Mexico. During their tour they travelled 6,400 mls.

Miss Nohr, the marcelleuse, wishes to announce that she has removed to the Leuzler Block above Hawkes' Store. Schoolgirls' marcel, 35c. and 50c. Ladies' marcel—50c and 75c. Also finger-waving 30 3p

Mr. and Mrs. H. W. Chambers visited with Mrs. Chambers' brother, Mr. T. W. McKay at Okotoks on Sunday. Mrs. Chambers says a new American oil company has unloaded a lot of machinery at that point and intend drilling in a new field.

A meeting of Westerdale Municipality was held Saturday last and all councillors were present. A number of routine matters were thrashed out and bills presented were passed for payment. The road supervisor reported that good progress had been made in roadwork and that about half the program had been carried out.

Hail adjusters for the municipalities as well as the insurance companies were in the district this week adjusting damages from the hailstorm which occurred here two weeks ago. They found the damage in this district not very large, more damage being done last Saturday when a strip about two miles north of town received considerable damage. In some parts, the storm passed over places that were damaged in the previous one.

Elmer and Elwood Evans left this week for a motor trip to California.

Benny Wyman has returned from Gull Lake, where he has been camping with friends from Lethbridge.

Mr. and Mrs. J. Boorman and family are spending their vacation at the C.G.I.T. camp at Sylvan Lake.

Mr. and Mrs. Geo. Liesemer and family and Mr. and Mrs. H. C. Liesemer are taking their vacation at Sylvan Lake this week.

Russell Berscht and Elmer Liesemer left yesterday for a motor trip thro' British Columbia and Washington.

Mr. and Mrs. J. Kelterborn of Milverton, Ontario and Mr. and Mrs. E. Kelterborn of Fort Saskatchewan, were visitors of Mr. and Mrs. J. V. Berscht.

The annual meeting of the W. C. T. U. will be held at the home of Mrs. Boettger on Thursday, August 14th at 3 P. M. It is requested that members make a special effort to be present. Reports of the years work to be given by the superintendent of the department.

Harvest is drawing near and reports of cutting are reaching this office. Mr. Harry Steckley reports having started cutting barley last Friday and Mr. Ted Lowne started cutting his 90-day oats on Tuesday. Lee Sanderman commenced on his wheat Tuesday and several farmers in the east country have started harvesting operations.

Cereal Field Day At Lacombe Station.

The annual Cereal Field Day, will be held at the Dominion Experimental Station, Lacombe, on Wednesday, August 20th. This will be a day of special interest to all farmers interested in the growing of good crops, but particularly will interest members of Seed Growers' Association and Co-operators who are growing varieties under numbers.

The Dominion Cerealist, Mr. L. H. Newman, will be at the station on this date and will discuss all questions pertaining to varieties and crop improvement. It is possible that the date, August 20th, may be a little late for some farmers but it is the earliest date on which we could arrange for Mr. Newman to visit the Lacombe Station. A meeting of the Alberta section of the Canadian Seed Growers' Association will be held at the close of the field meeting.

All farmers are invited to visit the Station for this field day. Bring your family and invite your friends. Coffee will be provided for lunch under the trees. Make this a day of pleasure and profit. Programme to commence at 1:30 sharp.

R. B. Bennett Will Be Dominant at Empire Conference.

When he goes to the Imperial Conference in London this fall, Premier R. B. Bennett will find himself by force of circumstance and political changes, the outstanding personality at that great Empire gathering of statesmen.

This is the opinion held in London in responsible quarters. He will go with the prestige of an untroubled parliamentary majority behind him, unlike his fellow-premiers from other Dominions.

Fresh from an election campaign in which Canada's tariff policies have been thoroughly canvassed, he will be able to express authoritatively, the Dominion's point of view on the most important question before the Imperial Conference, namely, that of the future economic unity of the Empire.

Industrial Board for Alberta.

Definite movement toward the formation of a Provincial Industrial Board took place on Monday when Premier J. E. Brownlee who is now holidaying in the east, instructed R. J. Dinning, liquor commissioner and Howard Stutchbury, provincial trade commissioner, to confer with Hon. Geo. Hoadley, acting premier and other ministers of the executive council now on duty, with a view to discussing preliminary matters relative to such a board, with secretaries of various boards of trade and chambers of commerce throughout Alberta. Out of these preliminaries will arise the decision as to whether the board will be formed.

In moving to have such a board formed, the Premier felt that a central board for the promotion of industry within the province would be a much more desirable state of affairs than to have each individual board function with an industrial section as has been the case in the past.

It is proposed to link up the work of the board with the duties of the trade commissioner, looking toward a co-ordination of general provincial publicity and any such campaigns that may be put to attract industry and the tourist trade.

It is expected discussions will commence in the near future.

Did Not Give Half The Road.

For failing to keep to the right of the centre of the highway when meeting the motor car of Donald MacDonald, G. Zimmerman, farmer of Olds district, was fined \$5 and costs by George C. Peattie, P. M. at Olds, on July 29th last. Constable W. B. Dobbin prosecuted.

The Pending Completion Of Hudson Bay Railway Will Stimulate Mining Interest

With the Hudson Bay Railway in its final season of construction, and with improved passenger and freight service, exploration of mineral properties to which the Bay line is tributary, has started on a really important scale for the first time. Several companies and syndicates have launched programmes to develop groups of claims in the neighborhood of the new steel trail.

A dull mineral season is in view for the region north of Churchill, but reports circulating in mining circles point to interesting activity along the Hudson Bay Railway.

Within the past few weeks, half a dozen parties have travelled north on the line to explore promising areas quietly, before there are signs of a rush to one of the many new discoveries northeast of The Pas.

However, it is unlikely that prospectors will be allowed to travel north of Mile 412 this year, unless special arrangements are made with the federal government. More than one well-known mining man from northern Ontario has reached The Pas this summer with the hope of travelling to Churchill. But they have been disappointed. In one instance, a man raised an argument here over the fact that an eastern station agent had checked his equipment right through to Churchill, and he had hurried to The Pas, only to find that he could not get to the port. Railway officials explained present regulations to the prospector, and he has to be content to postpone his trip until another season. It is reported in The Pas that efforts will also be made this year to trace down Indian reports that deposits of native silver lie in that great triangle southeast of the Hudson's Bay Railway, and bounded by God's River on the east, and Oxford Lake on the south.

Last year a few samples of beautiful filigree silver ore found their way into The Pas from York Factory. It was stated then that a York Factory man and some Indian companions had found the native metal somewhere in the mystic triangle. Excellent detective work on the part of mining engineers failed to show up the origin of the native silver, and the find—if there has been one—remains undivulged.

For years, Indian lore has hinted of spectacular silver to be found in that 62,500 square miles of territory. This season may see a climax to the silent drama of centuries and, who knows but what a second Cobalt may spring up in that little explored region south of York Factory on Hudson Bay.

New Type Mail Box

Sweden Installing One Which Gives Detailed Information

A new type of mail box with a detailed information chart is now being installed in Stockholm under the supervision of Sweden's postmaster-general, Anders Orne. The chart not only tells when the box is emptied, but also gives the location of the nearest post office or automatic stamp vending machine, as well as postal rates and the departure of mail trains for various parts of Sweden and abroad.

Wife (as they return from party): "Do you realize what you did?"
Hubby: "No, but I'll admit that it was wrong. What was it?"

New Application Of Marconi's Invention

"Is that Signor Marconi? Could you light my lamps? The electricity company has cut off the current." — Guerini Meschino, Milan.

W. N. U. 1846

Setting Pace In Egg-Laying Contest

Rhode Island Red Has Lead Of Seven Points

Records of the Canadian egg-laying contest at the Dominion Experimental Farm, Ottawa, this year, show egg production to be 2.7 per cent. above last year and 3.6 per cent. higher than in 1928 for the corresponding period. Birds entered appear to be swinging into greater production with the approach of summer, 33 pens having reached or passed the fifty-egg mark during the thirty-second week of the contest. It is interesting to note that of those 33 pens, 21 are White Leghorns.

While a pen of Barred Plymouth Rocks holds the leading position in the contest to date the leading individual layer so far is a Rhode Island Red. Two Barred Rock entries and this leading Rhode Island have laid the same number of eggs—14—but a slight advantage in weight on the part of the heavier Rhode Island Red gives her a lead of seven points over her nearest rival.

There is, however, indication that this year's egg-laying contest will show the same gratifying increase in egg production which has been in evidence each year since the contests were instituted in 1919. Some very fine records are likely to be hung up at the close of the contest.

Will Work On "E. P. Ranch"

Two Lancashire Girls Take Jobs Offered By Professor Carlyle

Two Lancashire girls arrived in Canada recently on the Canadian Pacific liner "Duchess of York" en route to Pekisko, Alberta, where they will start their careers on the "E.P. Ranch."

The two girls, Doris and Muriel Howe, sisters, said, "We do not know what we are going to do out there; it may be clerical or it may be housework. But that doesn't matter. Professor Carlyle, manager of the Prince of Wales' ranch, engaged us and we are looking forward as much to the new job as we are to seeing our brother who is coming from Saskatoon to meet us."

Doris worked in the office of a grocery business in Blackpool and her younger sister, Muriel, was in the public library at Blackpool.

Fruit Crop Prospects

Prospects For 1930 Crop Are Considered To Be Good

The fruit crop prospects for 1930, as on June 1st, are encouraging and, generally speaking, indicate the possibility of a total crop approximating that of 1929, according to the Department of Agriculture's crop report No. 2. Cherries, plums, peaches, pears and grapes, all indicate considerable increase over last year ranging from 9 per cent. in the case of cherries to 34 per cent. for plums. Apples promise well and while the total crop is expected to be less than last year, indications point to a yield equal to or slightly heavier than the average commercial crop for the five-year period 1925-29, estimated at 3,178,124 barrels.

B.C. Canned Salmon

Importance Of Coast Industry Is Shown By Figures

Shipments of British Columbia canned salmon from Vancouver to points outside of Canada in 1929 amounted in all to 1,213,697 cases of 48 pounds each, indicating the importance of the Pacific Coast canned salmon industry as a factor in the external trade of Canada. Australasian countries continued to be first among the purchasers, with France second and the British Isles third. Thirty different countries were customers of the British Columbia canned salmon exporters last year.

Manitoba Telephone Building

The Manitoba telephone system will commence construction on a 15-storey exchange this year which will cost in the neighborhood of \$1,000,000. Tyndall stone will be used.

New Provincial Park For British Columbia

Is One Of World's Finest Stands Of Timber

Cameron Lake Forest, on Vancouver Island, one of the world's finest stands of timber, will be made a provincial park under the plans announced by Premier Tolmie. As a first step in this project, probably the most important ever undertaken in Canada to preserve a virgin forest, the government has ordered an immediate cruise of the entire Cameron Lake area. This will be undertaken by the provincial forestry service and a report will be filed with the government before fall.

The Cameron Lake Forest, known to travellers from every part of the world, lies between the lake and the hills which are crowned by snow-capped Mount Arrowsmith. It consists of giant fir, cedar and balsam, growing close together and reaching to such heights that the island highway, winding between them, is in twilight on a sunny day.

Canadian Tobacco Industry

Considerable Quantity Of Canadian Product To Be Shipped To England

"If the necessity arises, the government will not hesitate to appoint a special commissioner in England to look after the interests of the Canadian tobacco growers," stated Hon. James Malcolm, Minister of Trade and Commerce here, in commenting on the tobacco domestic situation.

"The Canadian Government is in close touch with the tobacco growing industry," said Hon. Mr. Malcolm, "and through its trade agents in Great Britain, has already put the British manufacturer in close touch with Canadian growers. It is expected a considerable quantity of Canadian tobacco will be shipped to Great Britain this year," he said.

The British Empire

The British Empire occupies about one-quarter of the habitable surface of the earth and its population exceeds one-quarter of the estimated number of the human race.

High Milling Quality Of Canadian Wheat Flour Is Proven Under Rigid Tests

Women's Institutes

1,150 Women's Institutes In the Rural Districts Of Ontario

There are now 1,150 Women's Institutes in the rural districts of the Province of Ontario with a membership of over 40,000. These Institutes exist for promoting social contacts and whatever is beneficial to the community as a whole, especially to women and children, through co-operative effort. The movement, started at Stoney Creek, Ontario, in 1897, has now become world wide. Women's Institutes, wherever they exist, are non-sectarian and non-party political. Recently an international conference of representatives of Women's Institutes was held at Vienna, Austria, at which delegates from most of the important countries were present.

Destructive Wheat Disease

Loss Caused By Foot - Rot Greater Than Any Other

Of all the fungous diseases affecting wheat "Take-All," or foot-rot, is the most destructive, observed the Dominion Botanist of the Department of Agriculture, at Ottawa. The actual loss caused by it is far greater than by any other single disease, rust included, or perhaps a combination of all known fungous diseases affecting wheat. A peculiar thing about this disease is that it appears only once in a series of years. Fortunately for Canada, the exercise of proper care and the wholehearted support of Western farmers have kept the disease from becoming seriously established in Canada.

An alert Italian delicatessen dealer built his shop over an old mine shaft, so that the upcoming stream of cold air serves to keep his perishable commodities cool.

The high milling quality of Canadian wheat flour has recently been further proved by the Research Department of the Board of Grain Commissioners for Canada, as a result of a series of exacting tests. These tests show that blending of from 20 to 50 per cent. respectively of Canadian flours with weaker flours grown in other countries give bread varying from 1½ to 43 per cent. more cubical content than the country's domestic flour will produce. The largest loaf made during the tests was made from all Canadian flour. Samples of Russian, French, Australian, German, Danubian, Argentine and other wheats were used in the tests. Flour was milled from the samples obtained and loaves made from the flour and the results carefully noted. The addition of 20 per cent. Canadian flour with the unblended flour from the wheat of each country was then added and the size of the loaf was increased from 1½ per cent. in the Russian to 25 per cent. in the Argentine. An increase to 35 per cent. of Canadian wheat made an additional improvement in the size of the loaf.

Produces Better Eggs

Poultry Experts Find Large Hen Excels In Production

The larger the hen the better the eggs she lays and the more there are of them. Poultry experts of the Dominion Department of Agriculture find that body weight has a very direct relation to egg production. A three pound hen will average 137.9 eggs a year, weighing 23 ounces to the dozen. With each ¼ pound increase in weight there is an increase in the number of eggs laid and their weight per dozen—a four and a half pound hen will lay an average of 206.6 eggs a year weighing 24.5 ounces to the dozen. This item should be of particular interest to farmers keeping poultry flocks.

Ornamental Shrubs

Development Of Hardy Types Of Shrubs and Perennials

Not the least important of the work being done by the Experimental Farms and Stations of the Dominion Department of Agriculture is the development of types of ornamental trees and shrubs and hardy perennials, annuals, and garden flowers suitable for use in all parts of Canada. Many of these have been found suited to even the most difficult climatic conditions, and the report of the Experimental Farm or Station nearest you will provide an indication of varieties adapted to use in your locality.

Power Resources Of Manitoba

Claimed That 72 Per Cent. Of Water Power Resources Of Prairies Are Located In Manitoba

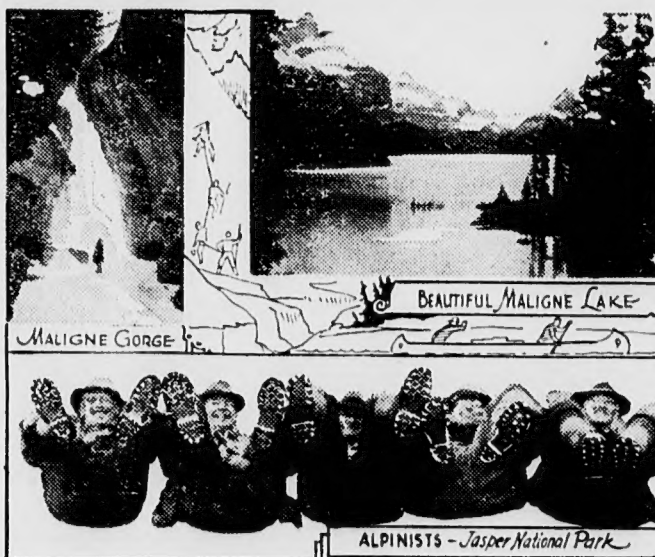

The considerable power resources of the Province of Manitoba are estimated at 5,000,000 h.p., of which 308,000 h.p. already are in operation. It is claimed that 72 per cent. of all the water power resources in the Prairie Provinces are situated in Manitoba. The Winnipeg River power sites are estimated to be sufficient to provide for a population of 2,500,000 in Winnipeg and to provide employment for 300,000 industrial workers. This power will turn out products worth in the neighborhood of a billion dollars every year.

Airplanes are being used in battles against insect pests in Peru.

"I warn you that you'll have to pay 5s. fine for bathing here."
"Certainly. Just take 5s. out of my jacket pocket, because I'm committing suicide." — Gutierrez, Madrid.

CENTER FOR ALPINE CLIMBING

Into a country where there are many important peaks still unconquered and even unnamed, will come Alpinists from all over the world for the 1930 annual camp of the Alpine Club, of Canada, July 28th to August 16th, in Jasper National Park. Alpine members of the medical profession of England, will be among those at this year's camp.

In this vast mountain kingdom, climbers will try their skill in the Maligne Lake region, where such peaks as Mt. Sampson, Mt. Charlton, Mt. Unwin, Mt. Warren, Mt. Mary Vaux, Mt. Maligne, and Mt. Brazeau—ranging from ten to eleven thousand feet in height, offer most interesting climbing problems.

It is perhaps the splendid prodigality, the massing of effects that distinguishes this region from all others. In the Rockies the folly of comparisons, where beauty is concerned, is always obvious. There are a score of lakes, each different, which, once seen, hold their place in the heart forever. Yet this stands out among them all. Where many of the others are chamber music, Maligne is the great orchestra. The composition forms one picture

but into it has gone enough beauty to make a dozen regions famous.

The Maligne Valley is one of the most interesting in Jasper National Park, not only on account of its remarkable canyon, but because of its two beautiful lakes — Medicine and Maligne.

The famous canyon of the Maligne River is an interesting example of what nature can do in the way of natural carving with uncounted aeons of working and with rushing water as her tool. Its great depth, its narrowness—in places it is scarcely more than a slit between dark walls of rock—and the great size of the pot holes, worn by the water in the course of ages, all make it of extreme interest to the geologist and nature lover and Alpinist.

One of the very interesting freaks of this canyon is the re-appearance at many places throughout its length of subterranean streams. It is believed that these streams form part of the submerged waters of Medicine Lake. Their combined waters so increase the flow of the river that by the canyon its volume is about four times greater than above the gorge.

BREWING TROUBLE

The entire continent of Europe is in a state of tension regarding the United States tariff regulations. The increasing refusal of United States to do business with those nations of Europe who must find money to pay war debts to United States herself has loosed a dangerous amount of pent-up resentment.

A few days ago representatives of fourteen continental nations met in Paris and took steps to increase the trade between themselves at the expense of United States. The copper importers of Britain, Germany, Belgium and France have united in a move to divert purchases from the United States to other producing countries, including Canada. The automobile factories of Latin Europe are considering the same thing. The European steel combine is taking measures to restrict further competitive imports from U.S.

Switzerland has suffered especially under the U.S. tariff which has caused disastrous loss of business amongst Swiss watchmakers.

ISSUE RULES FOR FARM PROSPERITY

The following rules have been formulated by agricultural experts here as an aid to better and more lucrative farming:

(1) Farm because he loves it; few people succeed in doing things they are not interested in.

(2) He should adopt a sound financial policy in his individual farm operation, and investment of any surplus funds which he accumulates should be in securities which can be converted quickly into cash when needed. Corporations or business men usually invest their surplus funds in good stocks and bonds not necessarily allied with their own business, with a daily market value so they can be immediately converted into cash if needed in their business. Farmers, when possible, should follow this principle.

(3) Plan his work; keep in close touch with his Provincial Agricultural College, experiment station and county agent.

(4) Have his soil analyzed and cultivate only productive land; base his production on demand as far as possible, and produce quality products.

(5) Join with his neighbors in organizing a co-operative marketing association through which to sell his products, because in union there is strength.

CANADIANS STILL LEAVING FOR UNITED STATES

During May, 1930, the Western Hemisphere contributed 5,638 immigrants to the United States, the

Miss Dorothy Hieland of Calgary is the guest of her uncle and aunt, Mr. and Mrs. Erven Rodney.

Miss Irma Heinsen of Dixon, Alberta, is visiting her sister, Mrs. H. C. Speelman.

Mr. Harvey Hosegood and his mother who have been on a motor trip to California and other points, returned home on Monday.

J. H. Curtis of Oas, will hold a service in the Westcott Baptist church on Sunday, August 10th, at 8 P. M.

Vesper Service at Knox United Church, next Sunday at 7-30. Sunday School and Church at Westcott at 3 P. M.

Bob Gooder, Bill Sutherland and Ward Wyman went to Sylvan Lake on Sunday to play with the Olds team against Eckville.

Dr. and Mrs. Palmer, Miss Wilmer Palmer, A.T.C.M., Mr. Frank Palmer of Munson, Alberta and Mr. Chas. Garrett of Lethbridge, visited with Mr. H. O. Tonjum last week.

Mr. and Mrs. F. Reiffenstein drove to Hanna on Sunday. They report that the hailstorm of two weeks ago was so bad that it pounded potatoes and garden stuff into the ground. The grain was completely destroyed on a strip six miles wide.

Mr. and Mrs. James Cummings and Miss Jean Cummings, parents and sister of Mrs. W. J. Hillyard, and Mr. and Mrs. W. Renten, all of Edmonton, spent the week end at the Hillyard home. Miss Jean Cummings will visit here for two weeks.

Mr. J. W. Phillipson, yesterday received a letter from Mr. H. A. Miller from Springfield, Oregon. Mr. Phillipson conducted Mr. Miller's auction sale and in settlement paid him \$25.00 to much and Mr. Miller enclosed a cheque to correct the mistake and forwarded by air mail. Jim says, "An honest man is the noblest work of God".

Didsbury Branch Red Cross Society thanks all those good people in the town and district who so promptly and handsomely responded to the appeal for clothing and other comforts to assist the family of the late Mr. R. E. Mosley; also the Hudson's Bay Co., the T. Eaton Co. Ltd. and the Robert Simpson Co. for splendid donations of furniture, bedding, etc.

W. J. Fulkerth's entries swept the board at Didsbury Fair last week. He had 17 entries and won 11 firsts and 6 seconds, all the seconds being won where he had two entries in the same class. Miss Aileen Kemmis, one of Calgary's lady riders assisted him in showing in the saddle classes and rode Laura La Plante in the ladies saddle class. Mrs. Glen Fulkerth rode Ruby, a three-year-old half-bred Kentucky mare in the same class. Mr. Fulkerth's horses are a credit to our district and the equal of any in the Province. He expects to make a larger showing next year as he has some good young prospects coming along.

major portion, 4,216, or 74.8 percent, coming from Canada, according to Harry E. Hull, Commissioner General of Immigration. There was a decrease in the inward movement of both aliens and citizens in May as compared with the preceding month. The number of aliens admitted during May was 36,940, including 19,414 immigrants and 17,526 non-immigrants. American citizens returning in May numbered 25,487.

Among the 21,414 aliens who departed in May, 17,694 were non-emigrants either going abroad for a short stay or leaving after a visit to this country, and 3,720 were emigrants. The outward movement this month of aliens and citizens shows an increase compared with the figures for April, 1930.

Here and There

(570)

While the Canadian Chamber of Commerce is completing plans for its official tour of China and Japan leaving Vancouver October on S.S. Empress of Russia, an important group of Japanese manufacturers and merchants is due to arrive at the same port July 25 on board the Empress of Canada for a tour of Canada and the United States.

To remove the prejudices of men, women want to be regarded as their partners and to be rewarded on merit regardless of sex, is the view of Miss Helen Cleveland, of Toronto, holder of a "man's" job with an internationally known bond house and recently elected president of Zonta International at the 10th annual meeting of this worldwide women's organization. With forty members of that body she is taking the Alaska trip aboard S.S. Princess Louise.

The greatest living golfer is Bobby Jones and the most enthusiastic golfer in the world is probably the Emperor of Japan, according to Walter Hagen, colorful U.S. golfer, just back aboard S.S. Empress of Russia after a tour of Australia, Japan and China. Both Hagen and Kirkwood who accompanied him, voiced high appreciation of Japanese golf courses.

Major Ian Hay Belth, noted author of "The First Hundred Thousand" and many other plays and novels, arrived recently at Quebec aboard S.S. Empress of France for a four week sojourn in the Dominion where he hopes "to fish and do nothing, although I may pick up an idea for a play or something, for one is always on the look out for likely material."

GRAIN BEING MOVED

All Preparations Being Made at
Elevators and by Railways for
Coming Crop

Prairie headquarters are getting
ready to handle the 1930 Western
crop. All available left-over grain is
being shipped to lake head and sea-
board, and the movement out of in-
terior terminal elevators to lake head
and coast is consistently better than
for some time.

It is expected that the 1930 crop
will run from 300,000,000 to 400,000,-
000 bushels, about 200,000,000 of
which will be available for export.

It is estimated that the railroad
companies have 100,000 box cars in
process of being moved to the 5,500
elevator sidings in the West, ready to
get a start on moving the crop.

The grain companies are getting
their elevators in shape to handle the
new crop, when it begins to be de-
livered about August 15th, and it is
estimated that the movement will be
in full swing by August 30th.

The huge new engines of the rail-
ways can haul a 100 box car train of
150,000 bushels, and these will all be
rushed into service.

There are to be no Eastern harvest-
ers west of Manitoba, as it has been
estimated that there are 8,000 com-
bines in the West with two men each
to do work done until three years ago
by nearly 20 men.

FEWER EXAMS URGED

Alberta is the most examination-
ridden province in the Dominion. The
departmental examination is required
in every subject, in every grade in
high school. Nothing but good would
result if the Department of Education
would grant the privilege to the high
schools of cities and towns of this
province, where teaching is carried on,
of promoting in the first two years of
high school these pupils whose work
through the year has been up to a
satisfactory standard. Pupils who fall
below the standard could be required
to write. This is the system now in
use in Grade VIII.

Written examinations as the basis
of promotion are objected to on the
ground that they make instruction
very formal and sacrifice freedom and
breadth in teaching to uniformity and
rigidity.

The kind of learning that is tested
is narrowly informational, while
teachers are able to test capacity and
achievement on a much fairer and
more satisfactory basis. — Calgary
Herald.

WHO SHALL DRIVE?

A survey of daily papers in almost
any locality will disclose an alarming
number of stories about automobile
accidents caused apparently by inex-
perienced drivers. Children too young
to drive competently, or adults driving
without sufficient instruction and
knowledge of traffic laws, are the
cause of many accidents and deaths.

It seems incredible that a small
child should be allowed to drive an
automobile without an adult beside
him. It is a dangerous practice to
allow small children to drive at all,
without the added folly of their being
allowed to take automobiles on the
highway alone.

A locomotive engineer must work
for years as a fireman in the train
cab before being allowed to pilot an
engine himself. In addition he is

DDD for acne and eczema

An active fluid that attacks disease
germs in the skin. In harmony with
the theory of the greatest living skin
specialist. It has had many brilliant
successes over skin disease.

ECONOMY

SATISFACTION

given a rigid examination to show
that his eyes, ears and heart are in
the best condition possible. An air-
plane pilot must take hours of lessons
before being allowed to fly alone, and
must have much added experience
before taking up passengers. Pilots,

too, must pass a physical examina-
tion.

In the face of this hundreds of per-
sons each day are out upon the state
and county highways at the wheels of
machines which are potential death to
every one of the countless persons

they pass and meet. Drivers unable
to see properly, to hear the sound of
a horn behind them, so young that
they are absolutely incapable of meet-
ing a crisis or so small that they are
unable to properly handle a car, are
daily allowed to drive automobiles.

Almost Obsolete . . the ice pick

And now, instead of hacking away awkwardly while splinters of ice fly here and there, you simply lift out the tray full of frozen cubes. They're just the right size, easily handled, always ready.

Now, too, you can have your frozen desserts ready in the short space of time it takes to prepare dinner, put them in the freezing compartment of the Electric Refrigerator when you start and at dinner-time they are perfectly frozen.

Convenient? of course. But more than that, a health essential. For medical authorities now say perishable food is safe from spoilage only when kept in a temperature of below 50 degrees. The dry cold of the Electric Refrigerator remains below 50 degrees the year round.

From every standpoint, the Electric Refrigerator is an essential convenience to the modern housewife.

A wide range of modern electrical appliances may now be purchased direct from the Calgary Power Company on a small down-payment balance to be paid with your regular monthly light bills.

See the local representative of

LIMITED.

WORLD HAPPENINGS
BRIEFLY TOLD

Five thousand members of the American Legion and lady members of the Legion auxiliary are to visit Winnipeg for two days in August.

A British Empire Trade Exhibition, the first of its kind to be held in any country outside the empire, is to be held in Buenos Aires from March 14 to April 27, 1931.

A new India House was opened in London by King George with an expression of hope for the emergence of India from her present troublous era into days of peace and contentment.

Official figures on unemployment, showed 1,815,300 out of work in Britain on June 23. This was about 70,000 less than on June 16, but 697,493 above the same date a year ago.

Sir Joseph Ward, former premier of New Zealand, who resigned a few weeks ago owing to ill health, is dead. Sir Joseph, who was known as "the grand old man" of New Zealand, was 74 years of age.

Ralph Collins, Edmonton, Alberta, has been awarded second prize in an oratorical contest at the convention of the Optimist International, in Erie, Pa. Seven boys from clubs in the United States and Canada, competed. David Wolf, Washington, D.C., was first.

Marriages at famous Gretna Green, the elopers' haven in Scotland, are to be made extinct by legislation. The Government plans to pass by next fall a measure which will make legal only marriages which have been performed by a clergyman or a registrar.

The Quai D'Orsay has submitted the name of Arsen Henry, who is French minister to Siam, to the Canadian Government for approval as the next French minister to Canada. Hon. Jean Knight, the first holder of this post, is returning to France to become head of the French Government Press Bureau.

UNCOOKED SALAD DRESSING

Warm weather and plenty of vegetables combine to make the tempting salad a frequent dish on the menu. The secret of a delightful salad is the dressing and here is the recipe for an uncooked salad dressing that will be relished by every member of the family — and it can be made up quickly, and, once made, it will keep for weeks:

- 2 eggs.
- 1 teaspoonful salt.
- 1 teaspoonful mustard.
- 1 cup vinegar.
- 1 can Eagle Brand Milk.

Beat vigorously all ingredients except vinegar, for a few minutes. Add vinegar, stir well and set aside for a few hours to thicken.

Plans To Visit the Moon

Scientist Has Perfected Model Of a Rocket That Will Make Trip

At Horst, a little bathing place on the Baltic, Professor Oberth has been very busy of late perfecting an exact model of the rocket in which he intends visiting the moon. This model rocket is to be shot up by the explosion of the gas it contains and instruments concealed in it will record the composition of the atmosphere through which it travels. An automatic parachute will bring the rocket down again when the motors are exhausted. The rocket-model is expected to reach a height of 100 kilometers and to bring back valuable secrets.

Doctor: "you say you have been drinking six glasses of beer a day? I can only allow you half that number."

Patient (after a pause): "I really believe I used to drink a couple more."—Mummel, Hamburg.

Winnipeg Newspaper Union

3444

IT'S SMART AND WEARABLE

A sportive frock of yellow and white printed linen boasts of its plaited skirt treatment.

It has the smartly belted waistline like the grown-ups are wearing, that achieves a pinched-in effect.

A large yellow bone button attracts attention to the tab closing of bodice with interesting cap sleeves.

The back is quite straight and slender.

Style No. 3444 is simplicity itself to make. It can be had in sizes 6, 8, 10, 12 and 14 years. For the miss of 8 years, 1 1/4 yards of 39-inch material with 1/4 yard of 39-inch contrasting is sufficient to copy it exactly.

The two-piece skirt is merely pressed into box-pleat effect and attached to the bodice. Patch pockets stitched at edge of plaits, secure a snug hipline, to keep its line slender.

It's so attractive in white cotton broadcloth printed in sailor blue polka-dots with cap sleeves, belt and pockets of plain blue.

Shantung is stunning in opal-pink shade.

Tub silks in baby blue or baby pink tones is just the cutest idea ever that promises to be very popular this summer for beach and country wear.

Nile green and white pique print worn with green leather belt is smart.

Yellow-beige and brown stripe in men's cotton shirting fabric is very effective with the cap sleeves and pockets cut on the bias and worn with brown leather belt.

Printed dimity, printed handkerchief lawn and gingham checks also appropriate.

Price 25 cents in stamps or coin (coin preferred).

English Students For Canada

Hamilton Fyfe, the new head master of Queen's University, Kingston, stated recently that a movement was reaching fruition by which English public school boys will go to Canadian universities in the same manner as Americans and South Africans are Rhodes scholars at Oxford.

Although we may be inconstant in many things, we stand loyally by our prejudices.

Takes First Glider Lesson

Prince Of Wales Coached By Famous German Pilot

The Prince of Wales has taken his first glider lesson.

The lesson was given near Lewes, Sussex, by Robert Kronfeld, a German, who is reputed to be the world's champion glider pilot. It consisted chiefly of a demonstration as how to operate the glider, and it was understood the prince did not actually pilot the ship.

The prince long has been an enthusiastic aviator and is reputed to be an excellent pilot, although for reasons of state he is never permitted to make solo flights. He always is accompanied on his flights by one of the best Royal Air Force pilots, but the prince handles the controls except when taking off or landing on strange or difficult landing fields.

Montreal Has Grown Rapidly

Is Now Fifth Largest City On the Continent

Few cities in Canada have shown such substantial growth as Montreal. Within a decade the total assessable property has doubled in value and is now \$1,200,000,000. In 1914 the population was 625,000; today there are a million people in the city proper. In 1914 there were 153 miles of streets and today there are 600 miles. The municipal revenue, which in 1914 was \$10,500,000, is now \$36,750,000. Montreal has reached the rank of the fifth largest city on the continent.

Kept Appointment

Four Men Keep Tryst Started 31 Years Ago

Keeping a tryst started 31 years ago, four men met in Trafalgar Square, London, England, on a recent night. In 1899 six young decorative artists, H. E. Hansfield, G. MacDonald, G. Clifton, E. Bite, Brown and Edwards, were notified that the studio in which they worked was to be razed. They then made a vow to meet once a year. This year only Mansfield, MacDonald, Clifton and Bite were able to attend, but the two absent ones sent telegraphic greetings to their friends.

Agricultural Conventions

Efforts will be made to bring as many large agricultural conventions as possible to the west at the time of the World's Grain Exhibition and Conference, in Regina, in 1932. According to a decision at a committee session, such conventions will be invited to meet directly prior to or following the show, in cities other than Regina. Delegates will thus be able to attend Regina session.

Slaves To Convention

Doctor Says Average Man Wears Too Much Clothing

Dr. Eugene L. Fisk, of the Life Extension Institute of America, lately gave strong support to the theory that the average man who walks the streets of a twentieth century city is "grossly overclad."

At this time of the year, such a theory goes far to prove itself. Nonetheless Dr. Fisk's collection of data is worth looking into. He had an examination made at the institute of the clothing worn by two dozen men and women. It was found that in mild weather the average woman wore about two pounds and a half of clothes, including shoes, and that the shoes of the average man alone weighed as much as that.

Completely clad, the average man wore eight and a half pounds of clothing. On any hot summer day he walked the hot asphalt streets with more than three times the weight of the average woman's raiment on his back. Dr. Fisk called for reform, and looked hopefully to England, where last summer some pioneer spirits began a movement to rationalize men's clothing.

Alberta's New Emblem

Wild Rose Is Made Symbol By Legislation

Today the wild rose is official floral emblem of Alberta. Legislation naming the new symbol went into effect with the soft-petalled flower at the height of its season dotting miles of roadside with gentle pink tones. The 25-year-old province of the foothills has hitherto owned mountain-peaks, of white and golden wheat fields as its symbol; the new acquisition is considered as harmonious as it is appropriate.

Ten Thousand Mile Trip

Veteran Investigator Of Sub-Arctic Plans Long Journey

Ten thousand miles of travelling in the untraversed stretches of the North West Territories is the prospect ahead of W. H. D. Hoare, veteran investigator of the sub-Arctic for the Dominion Department of the Interior. He plans one year of wandering through 1,500-square-mile Thelon game preserve, situated between Great Slave Lake and Hudson Bay.

Building Permits

Building permits issued by 61 cities in Canada during May of this year were valued at \$19,021,302. For the first five months of 1930 the total value of building permits issued by these cities had a value of \$65,267,996.

Reciprocal Trade

British Bankers In Favor Of Free Trade Within the Empire

Reciprocal trade agreements between the nations comprising the British Empire and the retention of an open market for Empire products was urged in a resolution adopted recently by representatives of several leading British banks meeting in the offices of Hambro's Bank, London, England. The meeting was presided over by Sir Eric Hambro.

"Urgent measures for the promotion of inter-Imperial trade are needed to secure and extend the market for British products, both at home and through export trade," the resolution read. "Bitter experience has taught Britain, that hopes expressed four years ago in the plea for removal of restrictions upon European trade have failed. Restrictions have been materially increased and the sale of surplus foreign products in British markets has steadily grown. While we retain hope for the ultimate extension of free trade worldwide, we believe the immediate step for securing and extending the market for British goods lies in reciprocal trade agreements between the nations of the British Empire. As a condition of securing these agreements Britain must retain an open market for all Empire products while being prepared to impose duties on all imports from other countries."

London Traffic Project

Scheme To Construct Underground Lines For Transportation Of Goods

A scheme is on hand to make possible the removal of goods traffic from London streets. It consists of the construction of underground lines, with fifty-four stations, for the sole purpose of carrying goods. The promoters are anxious to build seventy-five miles of tubes at a cost of about \$200,000,000. All the principal railway termini and goods yards would be connected; the docks, wharves, and public stores would have their private stations. It is said that 125,000,000 tons of goods are carried annually in London, and the trade of the Port of London amounts to \$144,000,000 a year. According to the promoters of the new scheme the cost of existing congestion in the streets is \$120,000,000 per annum, while the railways have estimated at \$300,000 a year the amount of money they lose by the detention of goods lorries at Billingsgate Market alone.

Minister—And what parable do you like best, my son?

Willie—The one about the multitude that loafs and fishes.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

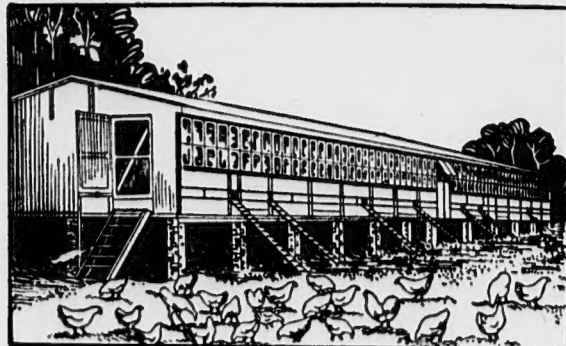

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Didsbury Pioneer - Established a quarter of a century

Melvin Notes.

Our best wishes are extended to
Mr. and Mrs. Janzen.

Fritz soon got tired of baching.
We hear he has a housekeeper.

Mr. and Mrs. J. Luft and family
are spending their holidays at Banff.

Billie Brown is back in our com-
munity again.

We wonder why Fritz came home
in the wee small hours of Saturday
morning.

A number of young folk were
entertained at the Chas. Youngs
home on Sunday afternoon.

"Go-Getters" have 12 ft toward
their mile of pennies which they an-
nounced they were collecting.

Fixing tires in the rain, after a
dance, isn't much fun. Ask Paul
and Harry Frasch.

Mr. Edgar Wiggins was called
home to Manitoba to the bedside of
his father who has been ill for some
time. Sympathy is extended.

Fritz and Allen received quite a
disappointment on Friday night.
Some are wondering why, but they
seemed to enjoy the dance.

Ross had good luck fishing but a
little tough for his new car, as he
had a flat tire some muddy road and
lost his robe. He will find same in
Fritz's car.

Miss Marion Johnston is spend-
ing this week with her grand-
parents in Didsbury. Mr. Troyer
is much improved and home from
the hospital again.

We wonder what happened to
Edgar and Orvin's car, as it made
a crooked track on Saturday. Emil
says one of the trees in his yard can
tell why.

Mrs. O. O. Swingle and party
on their way to Vancouver, visited
Mr. and Mrs. O. R. Swingle and
found Mr. O. R. Swingle able to be
out and around a little.

Mr. L. Carlson and J. W. Wel-
lington returned last week after
spending some time exploring the
north country. They don't speak
very favorably of that country, too
much mud this year.

TENDERS WANTED.

Tenders are invited for the kalsomin-
ing of the Westcott Schoolhouse. For
particulars, etc., apply to
Roland Webster, Westcott.

Burnside Notes

Miss Helen Proff is home from
Westerdale where she has spent
the summer.

Burnside U.F.A. will meet on
Monday evening August 11th in
Lone Pine Hall.

Billy Topley of Calgary is spend-
ing the holidays with his cousin,
Edward Topley.

Lone Pine W.I. will meet at the
Hall on Thursday, August 14th.
Mrs. Peter Schumaker will be hos-
tess and Miss Helen Proff will take
the topic, "Education."

A million dollar contract has
been offered the Torbanite Products
Co., Ltd. of New Glasgow, for Tor-
banite residue as it comes from the
Ginet retort. This order comprises
250,000 tons at \$4 a ton and be-
comes effective sixty days from
July 5.

Nova Scotia fisheries in 1929 had
a product valued at \$11,455,491 ac-
cording to a report issued by the
Dominion Bureau of Statistics.
Value of the preceding year's catch
was placed at \$3,504,583.

Prospects are that Canada will
this year advance into second place
among the gold-producing coun-
tries of the world. South Africa
holds first place and United States,
second. Last year the value of
gold produced in Canada was ap-
proximately \$40,000,000. This year
it is expected to be about \$60,000,-
000.

A short course for departmental
judges was held recently at the
Ontario Agricultural College,
Guelph. Over 125 were present,
including judges of ploughing
matches, standing field crops, heavy
and light horse, beef and dairy
cattle, and sheep and swine. Classes
were started some 15 years ago
and are primarily to get judges to-
gether for purposes of demonstra-
tion so that a uniform standard
may be maintained for judging at
shows and competitions.
